DATA SCIENTIST

I excel under pressure, thrive on challenges, and consistently deliver exceptional results. With a multidimensional approach to problem-solving, I extract valuable insights from complex data. My professional goal is to leverage data analysis to drive impact decision-making. Eager to contribute my problem-solving abilities and data-driven mindset to your team, I aim to help achieve strategic goals and tackle complex challenges.

PROJECTS

- **Rossman Sales prediction model**

Successfully developed end-to-end machine learning project in Python, including data cleaning, optimization, feature selection, and model building, utilizing libraries such as scikit-learn, pandas, numpy and seaborn, resulting in accurate predictions and valuable insights.

- **Data Warehouses**

Successfully built complete end-to-end data warehouse solutions by designing and implementing data architecture, setting up ETL processes, and creating insightful visualizations with Power BI, resulting in improved data-driven decision making and operational efficiency.

- **Wine Quality Classification**

Led a project comparing logistic regression and random forest models for imbalanced data, demonstrating random forest's superior predictive accuracy and logistic regression's interpretability, informing strategic model selection decisions.

EDUCATION

INFORMATION ENGINEERING
Master's degree
University of Belgrade, Faculty of Organisational Sciences

- Mathematical foundations in data science
- Data warehouses
- Data visualization
- Data science software development
- Data mining

MANAGEMENT OF TRAFFIC
Bachelor's degree
University Union - Nikola Tesla, Faculty of Law, Security and Management "Konstantin Veliki"

EXPERIENCE

SYSTEM ADMINISTRATOR
Jela Jagodina doo, 05.2022-12.2022

- Set up, configured, and maintained system backups to ensure data integrity
- Troubleshot and resolved network, system, and application issues in a timely manner
- Monitored and analyzed system logs to detect and address security threats

DRIVING INSTRUCTOR AND ADMINISTRATOR
AS Nesic, 01.2019-05.2021

- Provide instruction on vehicle parts, functions, and on-road regulations
- Continually assess students' progress and inform them when they are ready to take the driver's test.
- Maintaining IT equipment, including PCs, networks, and video surveillance systems, is crucial for ensuring smooth operations within a company.

SKILLS

- SQL
- Python
- Power BI
- Tableau
- ETL
- Machine learning algorithms
- Docker
- Bitbucket
- Git
- Firewall
- Critical thinking
- Problem-solving
